

Dear Gentleman,

We are against any type of deregulation, by ther FCC, regarding media ownership and the issueance of FCC licenses. I firmly believe that deregulation on the part of the FCC will lead surely and swiftly to corporate control of all media outlets within the United States. This will result in a filtered media based on the moral and financial dictates of the corporate board of directors (as recently seen in the banning of the music by the Dixie Chicks on all Clear Channel media sources because one member expressed her right to free speech). The media airways by law belong to the citizens of the United States of American, and as such are best served by as many and varied media sources (ownerships) as possible to maintain free speech ... which results in a democratic free society.

Vote no to any type of deregulation or legal updates which will result in the further consolidation of media outlets into the mega-media corporations.

Sincerely,

Ed Matson & Glenna Hayes
